SCOPE OF SERVICE

Dr. Abdulrahman Al Mishari Hospital is an acute care hospital opened in 1987 with a design capacity of 140 beds to serve the population of Riyadh area.

The hospital provides healthcare services to the community for all ages through a highly qualified medical staff supported by fully equipped state of art departments and 44 outpatient specialized clinics.

The hospital provide its emergency medicine services 24 hours/day.

VISION STATEMENT

To be the regional, private healthcare facility of choice, achieving excellence in advance care for Women's Health, Maternity and Childcare

MISSION STATEMENT

To treat each client as a member of our own family by committing to superior quality and safety in meeting the healthcare needs of the patient we serve, by fostering advanced and compassionate healthcare services.

HOSPITAL VALUES

These are the values which will underpin the way in which we will make our changes:

- Patient First:** We put the patient as the first priority in everything we do as we strive to deliver the very best to every patient every day.
- Respect :** We treat each individual with dignity and value those we serve and work with.
- Integrity :** We communicate openly, honestly and conduct ourselves according to the highest level of ethical standards.
- Innovation :** We embrace changes and continuously improve all that we do.
- Teamwork :** We build upon the collective strength and the cultural diversity of our staff to accomplish our mission and vision.
- Community :** We link our services to other community organizations for the benefit of our clients and community.
- Environment:** We strive to protect and continuously improve the environment.

HISTORY

In the late 1940s, the Kingdom of Saudi Arabia had experienced a smallpox epidemic. The disease had spread in most regions of the Kingdom. It was on those time when the healthcare sector was still in its infancy. The government, in spite of their best efforts, failed to fight the epidemic. Thousands succumbed to the disease, where almost every household have lost a loved one.

The four-year old Abdulrahman was not spared from the grief that the epidemic had brought. He witnessed the full spectrum of death that turned into a complete nightmare for the people who have lost a loved one. The smallpox epidemic was an agonizing battle where every victim fought hard to survive, but failed and end up dying. A family member closest to the heart of the little Abdulrahman was not spared from the killer disease and had died in his arms. This catastrophe was the turning point in Abdulrahman's life.

Abdulrahman started showing great interest in medicine. His passion for learning motivated him to excel in his studies and achieve his goal. He finally realized that he has found his true vocation and that is to be a great doctor. Medicine then was not just a career for him, but one beautiful dream to fulfill!

The legendary founder of the Kingdom of Saudi Arabia, King Abdul Aziz Al Saud, was a remarkable leader of imagination and vision who set Saudi Arabia on the road to modernization. He promoted improved education and invested in people, acknowledging that it is the key to the success of any development plan. Moreover, the Saudi government initiated an international scholarship program for Saudi nationals who desire to take part in the development plan, and Abdulrahman Al Mishari was one of them.

In 1972, the young Abdulrahman fulfilled his one big dream. He graduated and became the very first physician from the eastern province. He also became the first Saudi Member of the Royal College of Obstetrics and Gynecology in London. Reminiscing his childhood memories, Dr. Abdulrahman Al Mishari, was determined to come back to his country to return a favor, by taking an active part in his country's development.

Upon returning to his country, the Saudi government recognized and honored Dr. Abdulrahman Al Mishari for his achievements. They see in him the natural capability to run and supervise the construction of the very first College of Medicine in the Kingdom of Saudi Arabia that is intended to cater to the educational and professional needs of the young people.

In 1980, Dr. Abdulrahman Al Mishari was appointed as the Deputy Manager of King Khaled University Hospital, and Head of the Gynecology Department. As the Kingdom was developing rapidly, the University Hospital and Medical School was set for massive expansion and the responsibility of the Project Manager was given to Dr. Mishari. He was tasked to oversee the design and construction of the College of Medicine. Under his leadership, a modern school for the College of Medicine was built and more than 500 Saudi nationals graduated and became new doctors of the nation.

After investing many years in his teaching career, Dr. Mishari decided to pursue his other dream – the building of his own hospital, his own way of contributing to the development & infrastructure of the fast growing economy. With the financial support he received from the government, through the release of his non-interest loan, Dr. Mishari was able to build his own private hospital. By his knowledge, experience, and leadership skills, and the generous help that Dr. Mishari received from the government, **Dr. Abdulrahman Al Mishari Hospital** came to being.

In Year 1987, Dr. Abdulrahman Al Mishari Hospital was privileged to have been officially inaugurated by the Custodian of the Two Holy Mosques, King Salman Bin Abdul Aziz Al Saud (who was the Governor of Riyadh Region at that time).

Dr. Abdulrahman Al Mishari's hard work and sacrifices paid off. The impossible dream of the 4-year old boy became a reality, and became one of the most trusted and respected healthcare institution in the Kingdom of Saudi Arabia.

Today, Dr. Mishari's successors, his children Dr. Hadeel and Mr. Mohammed, are continuing their father's journey. Their quest for quality and service excellence is relentless, through their good leadership and passion for quality.

Dr. ABDULRAHMAN AL MISHARI

ABDULRAHMAN AL MISHARI, M.D., MRCOG, FRCOG, is a Physician and Consultant in Obstetrics & Gynecology. Dr. Abdulrahman Almishari was the Owner and Chief Executive Officer of Dr. Abdulrahman Al Mishari Hospital.

Dr. Abdulrahman Al Mishari maintains many professional and community affiliations, and has led numerous civic development activities in the Kingdom of Saudi Arabia.

Dr. Abdulrahman Al Mishari's journey started in the 1940s, when the Kingdom of Saudi Arabia was still in its infancy with little infrastructure and very few healthcare facilities, a small pox pandemic blighted the region where thousands of people succumbed to the disease. Dr. Abdulrahman's own family was not spared by the disease and as a 4-year old boy living in Hoffuf, he experienced the extreme pain of losing someone close to his heart, who died after a prolonged fight with the disease. His first encounter with serious illness and death inspired the little Abdulrahman to dream of becoming a great doctor someday, to help and save the lives of many. Dr. Abdulrahman threw himself vigorously into his studies and together with a group of like-minded medical students, he was sent by the government to Cairo to study for their Bachelor's Degree in Medicine. Dr. Abdulrahman became the **first physician graduated** from the Eastern Province, and to advance his medical qualifications, he traveled to the United Kingdom and Ireland and spent five years of training at leading hospitals in Dublin and London, including Saint George Bolton and the Bradford Royal. In 1972, Dr. Abdulrahman became a member of the Royal College of Obstetrics and Gynecology in London.

Dr. Abdulrahman returned home and was given honor by the Saudi government. He was assigned as Assistant Professor of Obstetrics and Gynecology at the King Saud University for several years. In 1980, he was appointed as Deputy Manager and Head of Gynecology at King Khaled University Hospital. When the pace of development increased dramatically, the University Hospital and Medical School embarked on a massive

expansion program and Dr. Abdulrahman was asked to manage the project design and the construction of the new College of Medicine in the Kingdom.

Dr. Abdulrahman Almishari held several positions in his professional career like Assistant Professor for Obstetrics & Gynecology at King Saud University (formerly, Riyadh University), Head of Obstetrics & Gynecology Department at King Abdul Aziz Maternity & Pediatric Hospital in Riyadh, Professor & Consultant Obstetrics & Gynecology at Riyadh Central Hospital (Shemese Hospital), Consultant Obstetric & Gynecology at Security Forces Hospital in Riyadh, and finally, the Founder & Owner of Dr. Abdulrahman Al Mishari Hospital, the first Obstetric & Gynecology Specialized Hospital in Riyadh.

In 1987, Dr. Abdulrahman Al Mishari's career took another leap forward when he decided to establish his own private hospital. By combining his own savings and with the generous funding from the Saudi government, Dr. Abdulrahman Al Mishari designed and constructed the first ever dedicated Obstetrics & Gynecology Hospital in Riyadh. The dream had become a reality!

Dr. Abdulrahman Al Mishari not only became one of the most famous and most respected Obstetric & Gynecologist Doctor in Riyadh but his unflagging commitment to medical profession have earned him countless awards and honorary degrees like, an Honor Diploma, the 20th Century Award for Achievement in the Field of Medicine, by the International Biographical Centre of Cambridge, England 1995, and the Lifetime Achievement Award by the Saudi Association of Obstetric & Gynecology in 2009.

EXECUTIVE SUMMARY

Dr. Abdurrahman Al-Mishari Hospital is situated in **Riyadh**, the capital city of the **Kingdom of Saudi Arabia**. It was **established in 1987** by **Dr. Abdurrahman Al-Mishari, MD. FRCOG**, as specialized (Obstetrics, Gynecology and Pediatrics) hospital but due to the community needs and requirements, the hospital was upgraded/converted to a general hospital covering all medical/surgical specialties by year **1989**. The hospital logo was also changed representing our commitment of providing the medical care for all family members. The hospital is conveniently located at midtown of Riyadh city, in a high populated business area with easy access from all nearby main roads, and minutes away from hypermarkets, malls, restaurants, hotels, two metro stations and close to King Salman Park.

Dr. Abdurrahman Al-Mishari Hospital is a private hospital serving healthcare Insurance companies' as well as private patients and patients referred by Red Crescent and Ministry of Health (as the hospital is part of EHALA system and part of readiness program TAAHAB) . The patient population is drawn from the local community, corporate sector and diplomatic corps/

Hospital was built in the shape of letter **(Y)** with central staircase; there are separate dedicated entrances for OPD clinics and emergency department with facility of ambulance driving and parking up to the emergency department. An additional extension unit was built for extending the out-patient services. The hospital design provides good communications, movements of patients across the facility and flexibility/acceptability of all needed changes from time to time

- The hospital has bed **capacity of 140**, and nursing accommodation within hospital's premises.

EXECUTIVE SUMMARY ...2

The hospital's nursery has **20** baby cradles and is equipped with all necessary equipment like phototherapy units etc., and other required facilities.

There are 4 operating rooms, **three main Operation Theaters** which are fully equipped having all the modern required equipment with additional dedicated recovery room. And one **dedicated operation theater for cesarean section**.

There are seven single Labor and Delivery Rooms for individual patient, fully equipped with modern technology like special delivery beds.

The emergency section is composed of three fully equipped emergency rooms for trauma/emergency cases and seven observation beds for extended observations with ONE minor operating room. The emergency department is supported by well equipped Ambulances one of these ambulances is equipped with advanced equipment and is designated as mobile MICU/ICU unit. The emergency unit has a fully equipped decontamination unit for biological and toxic decontaminations.

There are two Out-patient sections comprised of **44 specialized clinics** with all necessary facilities. The Out-patient Clinics are managed by Consultants/specialists along with technicians and nurses.

Accident & Emergency Dept., Pharmacy, Radiology and laboratory Services in the hospital are working round the clock 24/7.

- **Emergency department also has special Decontamination room for chemical, biological exposures and separate triage & waiting area for air-born precaution.**
- **The Quality & Patient Safety department consists of QPS manager – Patient Safety Coordinator – Quality Clinical Quality Coordinator – PI coordinator.**
- **Infection Prevention & Control Department consists of Infection Control Specialist – Infection Control Nurse.**
- **Hospital also have additional sub-licenses as follow:**

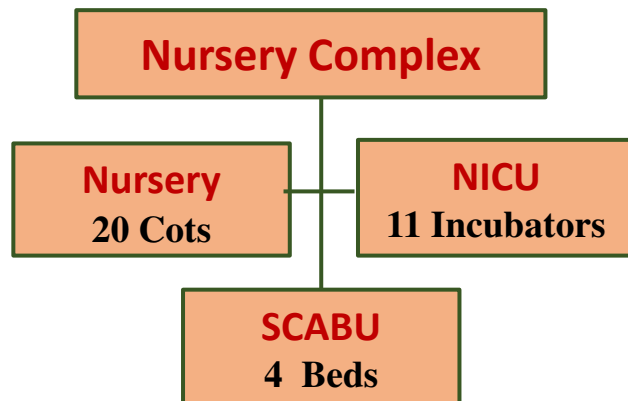

Pre-Marriage Check up	Bariatric & Obesity Unit	Renal Dialysis Unit
Iqama Check up	Tele-Medicine	Home-Care

EXECUTIVE SUMMARY ...3

Bed's Capacity :

- Made up from **Royal Suites, Junior Suites, single room** and **Double room**.
- Additional facilities includes **critical care unit (medical/surgical), neonatal intensive care unit** for critically newborn patients (**ventilator/incubators**) , **SCBU** for newborn growers & Feeders.
- **Negative pressure** for airborne infectious diseases, and **positive Pressure Rooms** for Immune Compromised Patients.
- **Renal dialysis unit** with a dedicated reverse osmosis water treatment plant.
- **Endoscopy Unit.**
- **Long-Term Unit.**
- **Home-Care Unit.**

Surgical Ward 30 Beds	Medical Ward 56 Beds + 1 (+) Pressure	Renal Dialysis 6 Machines + 1 isolation	Emergency 6 Beds + 1 (-) Pressure + 1 Minor OR
Pediatric Ward 20 Beds	Maternal Ward 20 Beds	ICU 8 Beds 1 (-) Pressure bed	PICU 4 Beds

In addition to a separate building inside hospital's premises dedicated as nursing accommodation, equipped and capable of being converted into inpatient wards with a total of 42 rooms.

EXECUTIVE SUMMARY ...4

Increasing of Bed Capacity:

In case of extreme emergencies' surge and/or disasters, the bed capacity can be raised from current capacity of (140 beds), to be raised up to (301) beds, by adding (161 beds) as temporary beds for a period of time (less than 24 hours) as per the classification and survey of the Ministry of Health.

Accreditation

Accredited By

**American Association of
Continuing Medical Education**

American Association of Continuing Medical Education (AACME) has served as the international predominant standards-setting and accrediting body for continuing medical education for over 10 years in over 96 countries worldwide, providing the highest level quality accreditation for nearly 16,000 member governmental and non-governmental hospitals, 5120 medical schools, 1300 medical specialty societies and state medical associations, and over 610 pharmaceutical companies, in addition to recognizing over 1230 International and, State Medical Societies, Medical Syndicates, governmental and private medical organizations

Accredited By

Joint Commission International

Improving the quality, safety, and efficiency of health care is a goal shared by health care organizations and countries around the world. Health care providers everywhere must keep pace with globalization and match demand for high-quality, accessible care.

Local needs vary and diverse cultures present unique challenges, yet **Joint Commission International (JCI)** stands alone as a consistent beacon for patient safety and quality improvement in the global community. Created in 1994 by The Joint Commission, JCI has a presence in more than 90 countries today.

JCI works with health care organizations, governments, and international advocates to promote rigorous standards of care and provide solutions for achieving peak performance. Our experts help organizations help themselves in three ways: accreditation, education, and advisory services

Accredited By

CBAHI

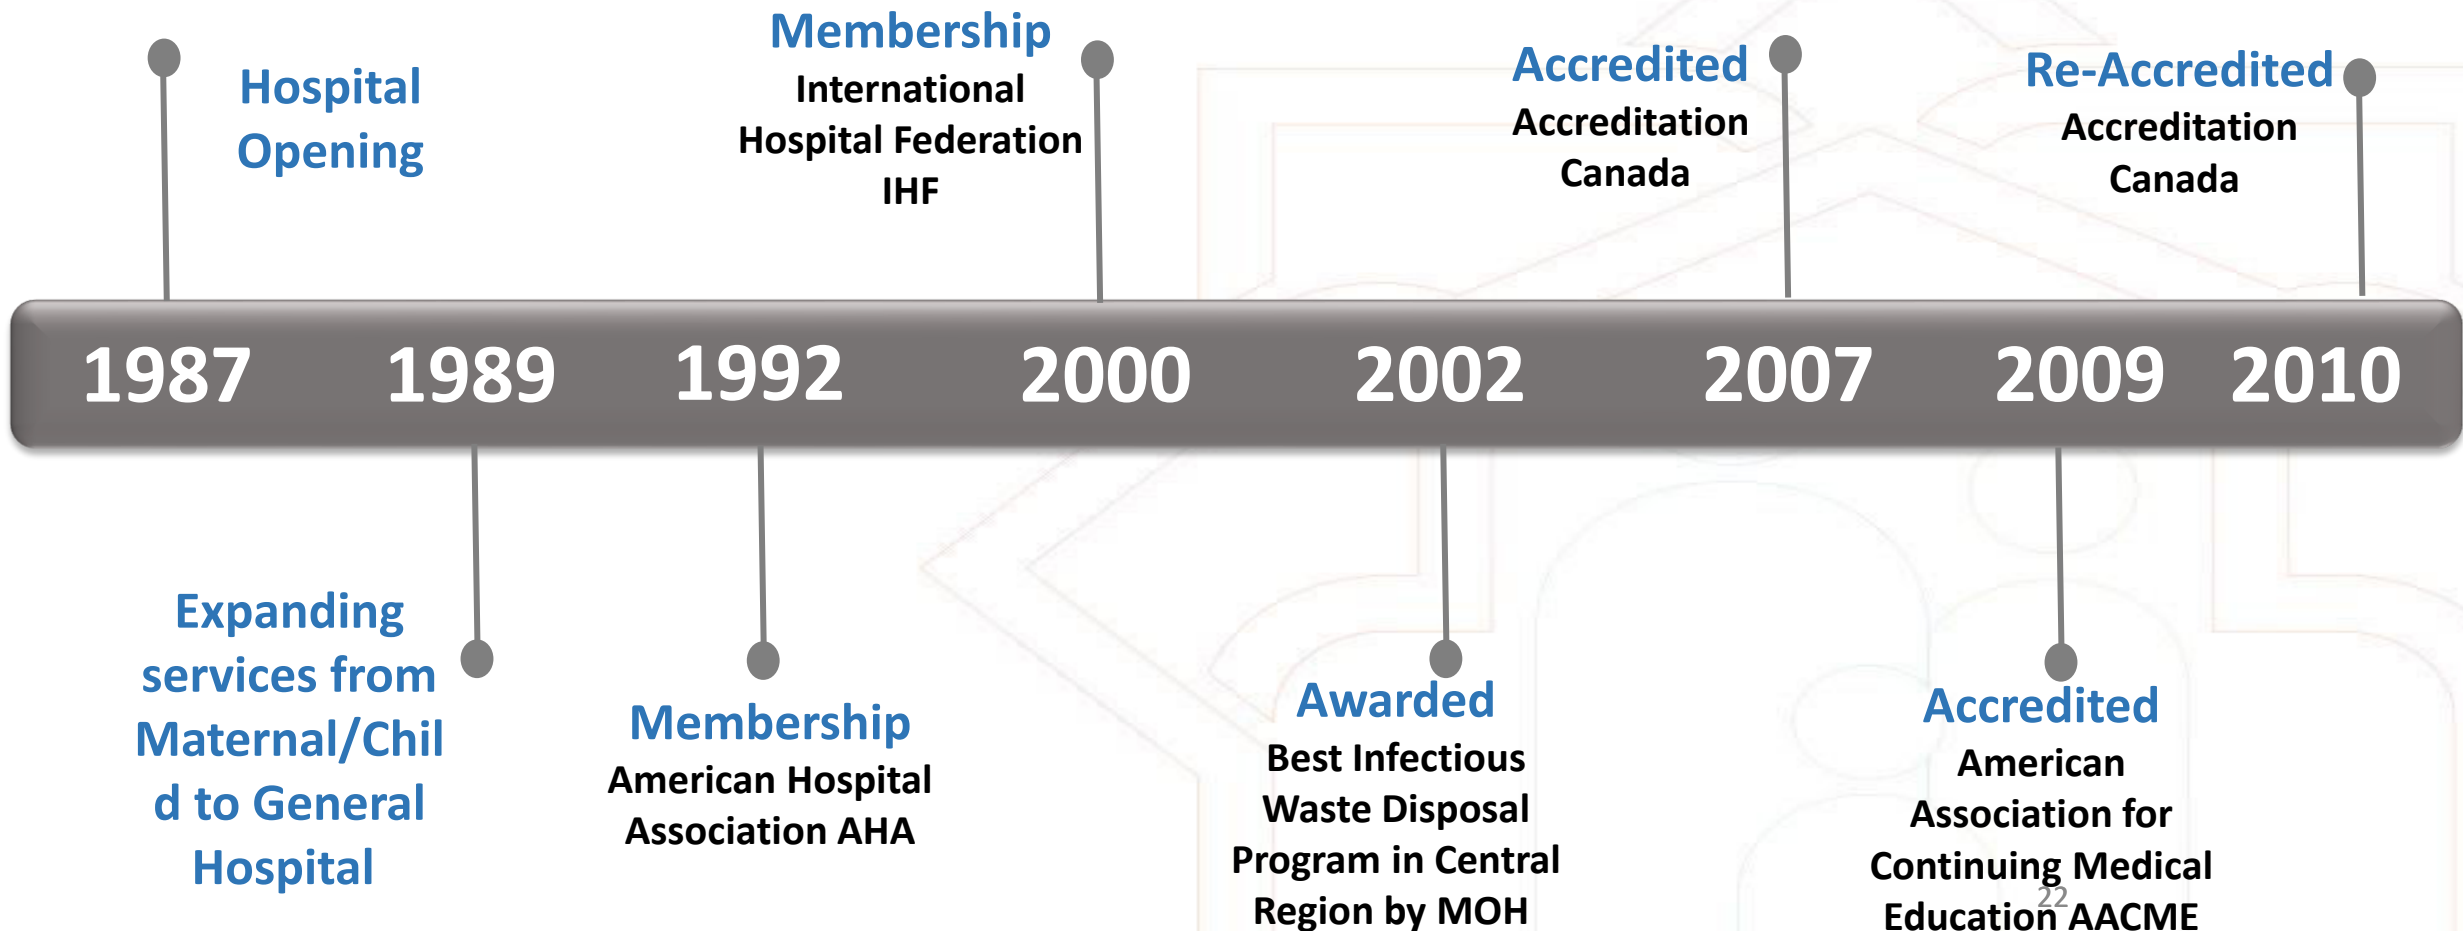

المركز السعودي لاعتماد المنشآت الصحية
Saudi Central Board for Accreditation of Healthcare Institutions

Saudi Arabia and its leadership is always good and never for the benefit of the homeland and the citizen, and the quality of health services and patient safety is a priority, and though has been the establishment of the Central Board for Accreditation of Healthcare Institutions by ministerial decree 144187/11 on 1/9/1426. We in the Central Board for Accreditation of Healthcare Institutions seek to build a solid foundation that cannot be competed at the local and the international level and this requires facilities in several areas and at different stages in the implementation of our strategic Plan. Our vision to be the future and the only global reference in the region requires us to make both physical and human effort to build a strong infrastructure working on improving the quality of health services, by attracting foreign and local experts.
